Profile Summary

Information Technology fresh graduate from Universitas Muhammadiyah Yogyakarta with a primary interest in UI/UX Design, supported by technical implementation skills in HTML, CSS, JavaScript, WordPress, and Laravel. Experienced in designing intuitive interfaces, from user research and wireframing through to prototyping in Figma, as well as implementing designs into functional websites. Has experience developing Laravel-based systems as a fullstack developer and is accustomed to working in teams.

Education

Universitas Muhammadiyah Yogyakarta - D.I. Yogyakarta, Indonesia

Sep 2022 – Jul 2026

Bachelor Degree in Information Technology, GPA 3.76/4.00

Internship Experience

UI/UX Designer & Web Developer

Feb 2026 – Apr 2026

Evolution IT — Yogyakarta, Indonesia

- Developed and enhanced a web-based employee attendance system using Laravel, covering both frontend and backend improvements.
- Improved the user interface (UI) and restructured the codebase for better organization and maintainability.
- Added new features: work schedule/shift management, task management, attendance logs with approval workflow, and a Top 5 Employee Discipline dashboard.
- Collaborated within a three-person team to analyze requirements, develop features, and implement the system.

UI/UX Designer

Feb 2025 – May 2025

Information Technology Study Program, Universitas Muhammadiyah Yogyakarta

- Redesigned the Information Technology Study Program website to support the accreditation process.
- Conducted stakeholder interviews, benchmarking, and information architecture to guide the website redesign.
- Designed wireframes and high-fidelity user interfaces in Figma, focusing on information architecture and navigation to make key information easier to find.

Project Experience

E-Commerce & Digital Marketing Module — MarketChain

Jan 2026 – Jun 2026

Fullstack Web Developer

- Designed and implemented E-Commerce features (product listing, automated B2C ordering, inter-team B2B transactions) and Digital Marketing features (multi-platform campaigns) for a business simulation game.
- Built with Laravel 12, PHP 8.2, and MySQL using the Agile method.
- Achieved 100% success in Black Box Testing; User Acceptance Testing scores of 88.44% (Expert) and 86.57% (User).

Homy Laundry App

Feb 2025 – Jan 2026

UI/UX Designer

- Responsible for designing wireframes, prototypes, and the interface of an Android application for a laundry SME to address error-prone manual record-keeping.
- Conducted Functional Testing and Usability Testing with the business owner to ensure features and user flow met requirements.
- Tech stack: Figma (design), Android Studio, MySQL.

Website IMM FH UMY

Jul 2025

UI/UX Designer & Web Developer

- Designed wireframes and prototypes in Figma, focusing on a modern look aligned with the organization's branding.
- Implemented the design in WordPress, resulting in the official website launch used for publishing organizational activities.
